Subject Index of Volume 50

Acidity
  influence of, in Friedel–Crafts acylation catalyzed by zeolites, 219
Acylation
  Friedel–Crafts; influence of acidity in, catalyzed by zeolites, 219
Alcohol
  allyl; kinetic studies on pH dependent oxidase *vs.* oxygenase mechanism for Ru(III)–EDTA catalyzed oxidation of, by molecular oxygen in aqueous acidic medium, 45
  aqueous alcohol solutions; functions of CdS surface composite layer and Pt on treated Pt/CdS for photocatalytic dehydrogenation of, 315
  in situ FT–IR study of adsorbed species on Cu–$ZnAl_2O_4$ methanol catalyst under 1 MPa pressure and at 525 K: effect of $H_2/CO/CO_2$ feed stream composition, 343
  mechanism of methanol oxidation over vanadia-based catalysts; FT–IR study of adsorption of methanol, formaldehyde and formic acid on vanadia and vanadia–silica, 241
  photoenhanced catalytic dehydrogenation of methanol with Sn(II)-coordinated Ir complexes, 303
  reaction network of alkylation of phenol by methanol on USHY zeolite; alkylation of aromatics, 211
Alkanes
  methane; selective air oxidation of, to formaldehyde using silica-supported $MoCl_5/R_4Sn$ olefin metathesis catalysts, L17
  nitromethane; enantioselective Michael additions of, to α,β-unsaturated ketones catalyzed by transition metal complexes with chiral nitrogen ligands, 11
Alkenes, Olefins
  active oxidation catalyst for electrochemical epoxidation of; *trans*-dioxo-bis(dimethylglyoximato)Ru(VII) perchlorate, 123
  alkene epoxidation with iodosylbenzene catalyzed by polymeric Schiff base chelates, L1
  bicyclo[2.2.1]hepta-2,5-diene; dehydrogenation of ring-opening metathesis polymers of: novel approach to conducting elastomers?, L23
  cationic (η^3-allyl)metal complexes: catalytic oligomerisation of ethylene; very selective dimerisation catalyst prepared from [(η^3-methallyl)Ni(cod)]PF_6 and a tris(3-sulphophenyl)phosphine salt, 291
  ethylene oxidation by Pd(II) complexes containing nitro and/or nitrato ligands in chloroform; mechanism of, 167
  photoenhanced homogeneous catalytic hydrogenation of, following XeCl excimer laser excitation of $RhH(CO)(PPh_3)_3$, 195
  polybutadiene; homogeneous catalytic hydrogenation of, 259
  $Re_3(CO)_{12}$–$(CH_3)_3NO\cdot 2H_2O$-catalyzed hydroesterification of, with alkyl formates, 31
  silica-supported $MoCl_5/R_4Sn$ olefin metathesis catalysts; selective air oxidation of methane to formaldehyde using, L17
Alkylation
  of aromatics; reaction network of alkylation of phenol by methanol on USHY zeolite, 211
Aluminium
  in situ FT–IR study of adsorbed species on Cu–$ZnAl_2O_4$ methanol catalyst under 1 MPa pressure and at 525 K: effect of $H_2/CO/CO_2$ feed stream composition, 343
Amines
  catalytic properties of polymeric Cu–amine–cellulose complexes, 181
  oxidation of, in presence of Ru complexes: molecular oxygen and iodosylbenzene as oxidants, 333
Aromatic compounds
  alkylation of aromatics; reaction network of alkylation of phenol by methanol on USHY zeolite, 211
  allyl phenyl carbonates; enantioselective CO_2 extrusion from, by Ni, Pd and Rh catalysts, L11

© Elsevier Sequoia/Printed in The Netherlands

benzylideneacetone catalyzed by iridium diphosphine complexes; selective hydrogenation on, 19
cationic (η^3-allyl)metal complexes: catalytic oligomerisation of ethylene; very selective dimerisation catalyst prepared from [(η^3-methallyl)Ni(cod)]PF_6 and a tris(3-sulphophenyl)phosphine salt, 291
iodosylbenzene catalyzed by polymeric Schiff base chelates; alkene epoxidation with, L1
iodosylbenzene and molecular oxygen as oxidants; oxidation of amines in presence of Ru complexes, 333
$PdCl_2(PPh_3)_2$ catalyzed carboalkoxylation of aryl bromides, L27
$RhH(CO)(PPh_3)_3$; photoenhanced homogeneous catalytic hydrogenation of olefins following XeCl excimer laser excitation of, 195
styrene; regioselectivity in Rh-catalyzed hydroformylation of, as function of reaction temperature and gas pressure, 1
Aspergillus niger 71
soluble and immobilized by NH_2 or COOH groups; influence of metal ions on endopolygalacturonase from, 251

Bidentate phosphine
hydrogenation reactions with $RuCl_2(L{-}L)_2$ (L—L = bidentate phosphine), 355

Cadmium
functions of CdS surface composite layer and Pt on treated Pt/CdS for photocatalytic dehydrogenation of aqueous alcohol solutions, 315
Carboalkoxylation
$PdCl_2(PPh_3)_2$ catalyzed, of aryl bromides, L27
Carbon dioxide
enantioselective, extrusion from allyl phenyl carbonates by Ni, Pd and Rh catalysts, L11
in situ FT–IR study of adsorbed species on $Cu{-}ZnAl_2O_4$ methanol catalyst under 1 MPa pressure and at 525 K: effect of $H_2/CO/CO_2$ feed stream composition, 343
Carbon monoxide
in situ FT–IR study of adsorbed species on $Cu{-}ZnAl_2O_4$ methanol catalyst under 1 MPa pressure and at 525 K: effect of $H_2/CO/CO_2$ feed stream composition, 343
Catalytic properties
dehydrogenation and dehydrocyclisation, of gallium oxide, L7
influence of support on, of bimetallic Ru—Cu samples, 67
of polymeric Cu–amine–cellulose complexes, 181
and preparation of anchored Ru and Rh clusters, 143
Cellulose
catalytic properties of polymeric Cu–amine–cellulose complexes, 181
Chlorine
hydrogenation reactions with $RuCl_2(L{-}L)_2$ (L—L = bidentate phosphine), 355
$PdCl_2(PPh_3)_2$ catalyzed carboalkoxylation of aryl bromides, L27
photoenhanced homogeneous catalytic hydrogenation of olefins following XeCl excimer laser excitation of $RhH(CO)(PPh_3)_3$, 195
selective air oxidation of methane to formaldehyde using silica-supported $MoCl_5/R_4Sn$ olefin metathesis catalysts, L17
trans-dioxo-bis(dimethylglyoximato)-Ru(VII) perchlorate; active oxidation catalyst for electrochemical epoxidation of olefins, 123
Chloroform
mechanism of ethylene oxidation by Pd(II) complexes containing nitro and/or nitrato ligands in, 167
Clusters
anchored Ru and Rh; preparation and catalytic properties of, 143
Copper
bimetallic Ru—Cu samples; influence of support on catalytic properties of, 67
$Cu{-}ZnAl_2O_4$ methanol catalyst under 1 MPa pressure and at 525 K; *in situ* FT–IR study of adsorbed species on; effect of $H_2/CO/CO_2$ feed stream composition, 343
polymeric Cu–amine–cellulose complexes; catalytic properties of, 181

Dehydrocyclisation
and dehydrogenation catalytic properties of gallium oxide, L7

Dehydrogenation
and dehydrocyclisation catalytic properties of gallium oxide, L7
photocatalytic; functions of CdS surface composite layer and Pt on treated Pt/CdS for, of aqueous alcohol solutions, 315
photoenhanced catalytic, of methanol with Sn(II)-coordinated Ir complexes, 303
or ring-opening metathesis polymers of bicyclo[2.2.1]hepta-2.5-diene: novel approach to conducting elastomers?, L23
Deoxygenation
Fe—Pd/ZSM-5, catalysts; investigation including ESCA analysis of, 81
Deuterium
H–D exchange and hydrogen spillover in Pd/SiO_2 system; kinetics and detection of hydrogen atoms, 153
Dimerisation catalyst
very selective, prepared from $[(\eta^3$-methallyl)Ni(cod)$]PF_6$ and a tris(3-sulphophenyl)phosphine salt; catalytic oligomerisation of ethylene; cationic (η^3-allyl)metal complexes, 291
DIOP
$Ru_4(CO)_8(OOCCH_2CH_2CH_2COO)_2$-[(−)-DIOP]$_3$: structure and reactivity, 277

Elastomers
dehydrogenation of ring-opening metathesis polymers of bicyclo[2.2.1]-hepta-2,5-diene: novel approach to conducting elastomers?, L23
Endopolygalacturonase
influence of metal ions on, from *Aspergillus niger* 71 soluble and immobilized by NH_2 or COOH groups, 251
Epoxidation
alkene, with iodosylbenzene catalyzed by polymeric Schiff base chelates, L1
electrochemical, of olefins; active oxidation catalyst for; *trans*-dioxo-bis(dimethylglyoximato)Ru(VII) perchlorate, 123

Fischer–Tropsch synthesis products
factors affecting the extent of branching in, with Fe-based catalysts, 103

Formaldehyde
and methanol and formic acid; FT–IR study of adsorption of, on vanadia and vanadia–silica; mechanism of methanol oxidation over vanadia-based catalysts, 241
selective air oxidation of methane to, using silica-supported $MoCl_5/R_4Sn$ olefin metathesis catalysts, L17
Formates
alkyl; $Re_3(CO)_{12}$–$(CH_3)_3NO\cdot 2H_2O$-catalyzed hydroesterification of olefins with, 31
Formic acid
and methanol and formaldehyde; FT–IR study of adsorption of, on vanadia and vanadia–silica; mechanism of methanol oxidation over vanadia-based catalysts, 241
Friedel–Crafts acylation
influence of acidity in, catalyzed by zeolites, 219

Gallium oxide
dehydrogenation and dehydrocyclisation catalytic properties of, L7

Hydroesterification
$Re_3(CO)_{12}$–$(CH_3)_3NO\cdot 2H_2O$-catalyzed, of olefins with alkyl formates, 31
Hydroformylation
and hydrogenation catalysts; comparative studies of Rh complexes of phosphines and phospholes as, 203
Rh-catalyzed, of styrene as function of reaction temperature and gas pressure; regioselectivity in, 1
Hydrogen
H–D exchange and hydrogen spillover in Pd/SiO_2 system; kinetics and detection of hydrogen atoms, 153
in situ FT–IR study of adsorbed species on Cu–$ZnAl_2O_4$ methanol catalyst under 1 MPa pressure and at 525 K: effect of $H_2/CO/CO_2$ feed stream composition, 343
Hydrogenation
active Pt—TiO_2, catalyst prepared by deposition techniques; porosity studies of, 131
first catalytic, of natural oils at ambient condition by intercalated Ru complex in montmorillonite, 97
homogeneous catalytic, of polybutadiene, 259

and hydroformylation catalysts; comparative studies of Rh complexes of phosphines and phospholes as, 203
photoenhanced homogeneous catalytic, of olefins following XeCl excimer laser excitation of $RhH(CO)(PPh_3)_3$, 195
reactions with $RuCl_2(L{-}L)_2$ (L—L = bidentate phosphine), 355
selective, on benzylideneacetone catalyzed by iridium diphosphine complexes, 19

Immobilization
influence of metal ions on endopolygalacturonase from *Aspergillus niger* 71 soluble and immobilized by NH_2 or COOH groups, 251
Iodosylbenzene
alkene epoxidation with, catalyzed by polymeric Schiff base chelates, L1
and molecular oxygen as oxidants; oxidation of amines in presence of Ru complexes, 333
Iridium
photoenhanced catalytic dehydrogenation of methanol with Sn(II)-coordinated Ir complexes, 303
selective hydrogenation on benzylideneactone catalyzed by iridium diphosphine complexes, 19
Iron
factors affecting the extent of branching in Fischer–Tropsch synthesis products with Fe based catalysts, 103
investigation including ESCA analysis of Fe—Pd/ZSM-5 deoxygenation catalysts, 81
photoinduced electron transfer with $[Fe_4S_4(SC_6F_5)_4]^{2-}$, 119

Ketones
enantioselective Michael additions of nitromethane to α,β-unsaturated ketones catalyzed by transition metal complexes with chiral nitrogen ligands, 11
selective hydrogenation on benzylideneacetone catalyzed by iridium diphosphine complexes, 19

Magnesium
composition of active component of supported V–Mg catalysts according to ^{51}V NMR data, 55

Metathesis
dehydrogenation of ring-opening, polymers of bicyclo[2.2.1]hepta-2,5-diene: novel approach to conducting elastomers?, L23
silica-supported $MoCl_5/R_4Sn$ olefin, catalysts; selective air oxidation of methane to formaldehyde using, L17
Michael additions
enantioselective, of nitromethane to α,β-unsaturated ketones catalyzed by transition metal complexes with chiral nitrogen ligands, 11
Molybdenum
rates and mechanism of stoichiometric oxidations of organic sulphides to sulphoxides with peroxomolybdenum complex $MoO(O_2)_2HMPT$, 39
selective air oxidation of methane to formaldehyde using silica-supported $MoCl_5/R_4Sn$ olefin metathesis catalysts, L17
Montmorillonite
first catalytic hydrogenation of natural oils at ambient condition by intercalated Ru complex in, 97

Nickel
cationic (η^3-allyl)metal complexes: catalytic oligomerisation of ethylene; very selective dimerisation catalyst prepared from [(η^3-methallyl)Ni(cod)]PF_6 and a tris(3-sulphophenyl)phosphine salt, 291
enantioselective CO_2 extrusion from allyl phenyl carbonated by Ni, Pd and Rh catalysts, L11
Nitrogen
enantioselective Michael additions of nitromethane to α,β-unsaturated ketones catalyzed by transition metal complexes with chiral nitrogen ligands, 11

Oils
natural; first catalytic hydrogenation of, at ambient condition by intercalated Ru complex in montmorillonite, 97
Olefins: see Alkenes
Oligomerisation
catalytic, of ethylene: very selective dimerisation catalyst prepared from [(η^3-methallyl)Ni(cod)]PF_6 and a

tris(3-sulphophenyl)phosphine salt; cationic (η^3-allyl)metal complexes, 291
Oxidase
pH dependent oxidase *vs.* oxygenase mechanism for Ru(III)–EDTA catalyzed oxidation of allyl alcohol by molecular oxygen in aqueous acidic medium; kinetic studies on, 45
Oxidation(s)
active, catalyst for electrochemical epoxidation of olefins; *trans*-dioxobis(dimethylglyoximato)Ru(VII) perchlorate, 123
of amines in presence of Ru complexes: molecular oxygen and iodosylbenzene as oxidants, 333
ethylene, by Pd(II) complexes containing nitro and/or nitrato ligands in chloroform; mechanism of, 167
methanol, over vanadia-based catalysts; mechanism of; FT–IR study of adsorption of methanol, formaldehyde and formic acid on vanadia and vanadia–silica, 241
Ru(III)–EDTA catalyzed; kinetic studies on pH dependent oxidase *vs.* oxygenase mechanism for, of allyl alcohol by molecular oxygen in aqueous acidic medium, 45
selective air, of methane to formaldehyde using silica-supported $MoCl_5$-/R_4Sn olefin metathesis catalysts, L17
stoichiometric, of organic sulphides to sulphoxides with peroxomolybdenum complexes $MoO(O_2)_2HMPT$; rates and mechanism of, 39
Oxygen
kinetic studies on pH dependent oxidase *vs.* oxygenase mechanism for Ru(III)–EDTA catalyzed oxidation of allyl alcohol by molecular oxygen in aqueous acidic medium, 45
oxidation of amines in presence of Ru complexes: molecular oxygen and iodosylbenzene as oxidants, 333

Palladium
enantioselective CO_2 extrusion from allyl phenyl carbonates by Ni, Pd and Rh catalysts, L11
H–D exchange and hydrogen spillover in Pd/SiO_2 system; kinetics and detection of hydrogen atoms, 153
investigation including ESCA analysis of Fe—Pd/ZSM-5 deoxygenation catalysts, 81
mechanism of ethylene oxidation by Pd(II) complexes containing nitro and/or nitrato ligands in chloroform, 167
$PdCl_2(PPh_3)_2$ catalyzed carboalkoxylation of aryl bromides, L27
Phosphorus
cationic (η^3-allyl)metal complexes: catalytic oligomerisation of ethylene; very selective dimerisation catalyst prepared from [(η^3-methallyl)Ni(cod)]PF_6 and a tris(3-sulphophenyl)phosphine salt, 291
comparative studies of Rh complexes of phosphines and phospholes as hydroformylation and hydrogenation catalysts, 203
hydrogenation reactions with $RuCl_2$-(L—L)$_2$ (L—L = bidentate phosphine), 355
$PdCl_2(PPh_3)_2$ catalyzed carboalkoxylation of aryl bromides, L27
photoenhanced homogeneous catalytic hydrogenation of olefins following XeCl excimer laser excitation of $RhH(CO)(PPh_3)_3$, 195
selective hydrogenation on benzylideneacetone catalyzed by iridium diphosphine complexes, 19
Photocatalysis
functions of CdS surface composite layer and Pt on treated Pt/CdS for photocatalytic dehydrogenation of aqueous alcohol solutions, 315
Photoinduced electron transfer
with $[Fe_4S_4(SC_6F_5)_4]^{2-}$, 119
Platinum
functions of CdS surface composite layer and Pt on treated Pt/CdS for photocatalytic dehydrogenation of aqueous alcohol solutions, 315
porosity studies of active Pt—TiO_2 hydrogenation catalyst prepared by deposition techniques, 131
Polybutadiene
homogeneous catalytic hydrogenation of, 259
Polymers
alkene epoxidation with iodosylbenzene catalyzed by polymeric Schiff base chelates, L1
catalytic properties of polymeric Cu–

amine–cellulose complexes, 181
ring-opening metathesis, of bicyclo-[2.2.1]hepta-2,5-diene: dehydrogenation of; novel approach to conducting elastomers?, L23
Porosity studies
of active Pt—TiO_2 hydrogenation catalyst prepared by deposition techniques, 131

Rhenium
$Re_3(CO)_{12}$–$(CH_3)_3NO \cdot 2H_2O$-catalyzed hydroesterification of olefins with alkyl formates, 31
Rhodium
comparative studies of Rh complexes of phosphine and phospholes as hydroformylation and hydrogenation catalysts, 203
enantioselective CO_2 extrusion from allyl phenyl carbonates by Ni, Pd and Rh catalysts, L11
photoenhanced homogeneous catalytic hydrogenation of olefins following XeCl excimer laser excitation of $RhH(CO)(PPh_3)_3$, 195
preparation and catalytic properties of anchored Ru and Rh clusters, 143
regioselectivity in Rh-catalyzed hydroformylation of styrene as function of reaction temperature and gas pressure, 1
Ruthenium
first catalytic hydrogenation of natural oils at ambient condition by intercalated Ru complex in montmorillonite, 97
hydrogenation reactions with $RuCl_2$-$(L—L)_2$ (L—L = bidentate phosphine), 355
influence of support on catalytic properties of bimetallic Ru—Cu samples, 67
kinetic studies on pH dependent oxidase *vs.* oxygenase mechanism for Ru(III)–EDTA catalyzed oxidation of allyl alcohol by molecular oxygen in aqueous acidic medium, 45
oxidation of amines in presence of Ru complexes: molecular oxygen and iodosylbenzene as oxidants, 333
preparation and catalytic properties of anchored Ru and Rh clusters, 143
$Ru_4(CO)_8(OOCCH_2CH_2CH_2COO)_2$-[(−)-DIOP]$_3$: structure and reactivity, 277
trans-dioxo-bis(dimethylglyoximato)-Ru(VII) perchlorate; active oxidation catalyst for electrochemical epoxidation of olefins, 123

Schiff base chelates
polymeric; alkene epoxidation with iodosylbenzene catalyzed by, L1
Silicon
H–D exchange and hydrogen spillover in Pd/SiO_2 system; kinetics and detection of hydrogen atoms, 153
mechanism of methanol oxidation over vanadia-based catalysts; FT–IR study of adsorption of methanol, formaldehyde and formic acid on vanadia and vanadia–silica, 241
selective air oxidation of methane to formaldehyde using silica-supported $MoCl_5/R_4Sn$ olefin metathesis catalysts, L17
Spectroscopy
composition of active component of supported V–Mg catalysts according to ^{51}V NMR data, 55
FT–IR study of surface properties of polycrystalline vanadia, 231
in situ FT–IR study of adsorbed species on Cu–$ZnAl_2O_4$ methanol catalyst under 1 MPa pressure and at 525 K: effect of $H_2/CO/CO_2$ feed stream composition, 343
investigation including ESCA analysis of Fe—Pd/ZSM-5 deoxygenation catalysts, 81
mechanism of methanol oxidation over vanadia-based catalysts; FT–IR study of adsorption of methanol, formaldehyde and formic acid on vanadia and vanadia–silica, 241
Sulphur
cationic (η^3-allyl)metal complexes: catalytic oligomerisation of ethylene; very selective dimerisation catalyst prepared from [(η^3-methallyl)Ni(cod)]PF_6 and a tris(3-sulphophenyl)phosphine salt, 291
functions of CdS surface composite layer and Pt on treated Pt/CdS for photocatalytic dehydrogenation of aqueous alcohol solutions, 315
photoinduced electron transfer with $[Fe_4S_4(SC_6F_5)_4]^{2-}$, 119
rates and mechanism of stoichiometric oxidations of organic sulphides to

sulphoxides with peroxomolybdenum complex $MoO(O_2)_2HMPT$, 39
Surface properties
of polycrystalline vanadia; FT–IR study, 231

Tin
photoenhanced catalytic dehydrogenation of methanol with Sn(II)-coordinated Ir complexes, 303
selective air oxidation of methane to formaldehyde using silica-supported $MoCl_5/R_4Sn$ olefin metathesis catalysts, L17
Titanium
porosity studies of active $Pt—TiO_2$ hydrogenation catalyst prepared by deposition techniques, 131

Vanadium
composition of active component of supported V–Mg catalysts according to ^{51}V NMR data, 55
FT–IR study of surface properties of polycrystalline vanadia, 231
mechanism of methanol oxidation over vanadia-based catalysts; FT–IR study of adsorption of methanol, formaldehyde and formic acid on vanadia and vanadia–silica, 241

Xenon
photoenhanced homogeneous catalytic hydrogenation of olefins following XeCl excimer laser excitation of $RhH(CO)(PPh_3)_3$, 195

Zeolites
alkylation of aromatics; reaction network of alkylation of phenol by methanol on USHY zeolite, 211
influence of acidity in Friedel–Crafts acylation catalyzed by, 219
investigation including ESCA analysis of Fe—Pd/ZSM-5 deoxygenation catalysts, 81
Zinc
in situ FT–IR study of adsorbed species on $Cu–ZnAl_2O_4$ methanol catalyst under 1 MPa pressure and at 525 K: effect of $H_2/CO/CO_2$ feed stream composition, 343
